

# EVIL EYE CARABINER

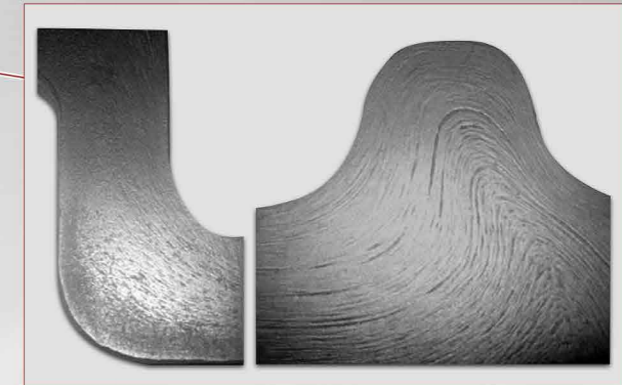

**REVOLUTION  
OF TRIMMERS**

**FORGED ALUMINUM**

## STRUCTURE OF MOLECULAR COHESION

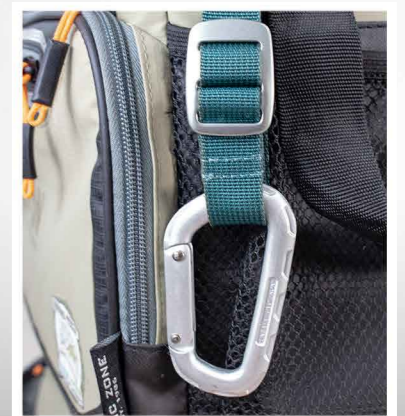

**FORGED**  
(Aligned grain structure)

It causes the individual crystal grains to become elongated and flow in the direction of the deformation. This increases the strength and reduces the tendency for crack to form in highly stressed locations such as corners and shoulders.

## FORGED ALUMINUM:

- Produced by a die tooling design, forging can give out surprisingly different shapes.
- Aluminum forging can attain good strength, unlike other methods.
- Less likely to crack or break under high stress.
- Forged aluminum is stronger than cast aluminum.
- Corrosion resistance.
